# PERHAPS THIS BICYCLE IS THE ONE-MILE-A-MINUTE MACHINE, MICHAEL'S NEW

Afbert Schock, the Six-Day Rider. Has Tried It on the Manhattan Beach Track, and Says It Will Revolutionize the Present and twenty yards of a within a few Bicucle—It is Chainless and Geared to Two Hundred and Fiftu.

MECHANICAL surprise will be sprung, in all probability, on the cycling world within a few days, and all records for speed will go by the board if the present prospects of the new machine's capacity are realized. A well-known Brooklyn lawyer has invented a bicycle with a present gear of 250, and he is confident that he will see a mile close to the minute mark. Albert Schock, the well-known six-day champion, is the only rider of prominence who has seen the and is the only one outside of the inventor who has ridden it. Mr. Schock, who is a conservative man, said:

I have every belief in the n w wheel and really expect that it will revolutionize the present bleycle. It is mechanically correct, and with a few minor alterations as to weight and gear I believe the wheel will prove satisfactory. I was very busy in my store one day when a man walked in and introduced himself, alterations as to weight and gear I believe the wheel will prove satisfactory. I was very busy in my store one day when a man walked in and introduced himself, stating that he had heard of my ability as a rider and wanted me to go and look at a new wheel he had invented. He took me to his office and there showed me what I consider will prove to be the speedlest bicycle that has ever been invented. Its present gear is 250, but I advised 150 to 175, although I did not seem to have much more work propelling 250 gear than I did my 90 six-day & ear. The speed that you get out of the new bicycle is simply terrific. The inventor is a rather small-sized man, and he tells me that he rode a half mile in 43 seconds, and in a trial I made on the bicycle path the other night I must have been travelling close to the minute m ark. The only difficulty I experienced was in turning, and I think the very high gear is responsible for that."

"I had a private trial at Manh attan Beach at midnight Tuesday, and I am not at liberly to say what time I made, but II use the machine in the \$2,000 handicap on Saturday and Monday I will win the race. I might say that I had trouble at the turns owing to the high rate of speed attained in the straight, but with a lower gear the inventor I s now trying to get I think it will be quite possible to do 1:30 without pace."

The question whether Mr. Schoc k will be allowed to use the machine in racing was referred to A. G. Batchelder, the handicapper, and he stated that in the general rules of the L. A. W. Rac ing Board, clause K covers that point. It is as follows: "The Board reserves the right to exclude from the racing path any and all machines which, in its jud gment, do not come within the commonly accepted meaning of the term "bicycle," either by peculiarity of construction or by undoubted mechanical advantages which they may possess." The new invention undoubtedly possesses mechanical advantages, so it is a question whether the referee, Mr. Mott, will allow him to start in the \$2,000 handicap

Rain Prevents the Star-Pointer—Joe
Patchen Match, but They Will
Meet at Hartford To-day.

Hartford, Conn., Sept. 2.—Even the glants of the light harness arena are pigmies when it comes to an argument with the weather clerk. After all the preparations for the match between Star Pointer and Joe Patchen, at Charter Oak Park to day, the storm arrived just in time to spoil the fun. The terrific downpour that began shortly before daylight this morning left the course in such a sorry plight that long before the time for resuming the sport interrupted by darkness last evening it was known that everything was off for the present.

The sun came out this afternoon, and Sectored in the vertical of the verdict by a length. Cann Day barely beat the outsider, Laverock, for playe beat the outsider. Laverock, for playe beat the outsider, Laverock, for playe beat the outsider. Laverock, for playe beat the outsider, Laverock, for playe beat the outsider. Laverock, for player beat the second race, won by his filly Partridge and claimed to have bet only \$100 on her, but somebody invested so much money on the daughter of Longfellow that her price fell from fives to 11 to 5. Partridge waited with her horses in a very slow race, and, coming on at the finish, won without an effort. The favorite, Ramiro II., and Lakeshore, who carried a lot of money, did not have speed enough to head a built in a lane, and were the last part at the finish.

Hairpin at last got out of the maiden class in the opening race. Yankee Sam came with a rattle at the finish, but Hairpin had him beaten. There was a big tip on the malden filly. Zella, but she did no better than run into third money.

Trolley Showed Speed.

Trolley won a fast race at six furlongs, after making all her own running. Tripping brought her to a drive, but was besten a good neck. Clayton rode the winner, scoring brackets twice during the winner, scoring brackets twice during the president of the A. A. U. ping brought her to a drive, but was beaten a good neck. Clayton rode the winner, scoring brackets twice during the

winner, scoring brackets twice during the day.

Sloane landed his second winner of the day in Poetess in the mile handleap. This staunch filly came away when called upon in the stretch and won handlly, though she tried to swerve at the finish.

Estaca was claimed off Pat Dunne by Griffin and Simons, the owners of Break o' Day. The colt cost his new owners \$1.220.

Wilhite was suspended for one day for imperfinence and refusing to break in the fourth race. Bill Daly's light-weight, O'Connor, got the same punishment for spoiling the start in the first race, Mrs.

1; for three-year-olds and upward which had four more than two races in 1807; weights 10 below the scale; penalties. One mile.
